FOR YOUR ROOFS

**PRE
ENGINEERING
buildings**

METALBERG BUILDING SYSTEMS have come a longway in the field of prefabricated tubular and structural steel roof structures. These are best suited for workshops, warehouses, factories, site offices, Assembly links , Poultry sheds, etc or where a large space without pillar / posts are required with roofing of very good height. Special designs can be offered to suit various individual.

Benefits in Pre - Engineering Buildings.

1. Unobstructed large clean space span upto 50m.
2. Bay length non obstructed upto 10 m and using jack beams allows upto 20m.
3. Eaves height upto 30 m.
4. The weight of the pre-engineered structure is 30% Lighter and therefore less expensive leading to cheaper and simple light weight buildings.
5. Price per sq. meter could be 30% lesser than conventional concrete buildings.
6. Light weight frame offers higher resistance to seismie force than the heavy concrete structure.
7. Easy to switch places in case of necessacity to change the place.
